EXPECTATIONS SURVEY FOR NORGES BANK Q2 2022

The survey questions economists, social partners, business leaders
and households

20 May 2022

Preface

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth, the krone exchange rate and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions.

The survey questions four target groups. Online surveys are used for economists in the financial industry and academia, as well as for representatives of main employer and employee organisations and business leaders. Telephone interviews are used for a random selection of individuals in Norwegian households.

The expectations survey is conducted every quarter and was conducted for the first time in February 2002. Ipsos has conducted the survey from Q3 2020. The report is written by Britt Kristine Ludvigsen. The survey was previously carried out by Epinion, Opinion and TNS Gallup.

Summary

Brief, overall summary

Short-term price inflation

The economists expect goods and services inflation 12 months ahead to be 3.7 per cent, up 0.5 percentage point from the previous quarter. The social partners expect goods and services inflation to be 3.5 per cent 12 months ahead, same percentage as the previous quarter. Business leaders expect goods and services inflation to be 5.4 per cent 12 months ahead, up 0.7 percentage point from the previous quarter. Households expect goods and services inflation to be 4.3 per cent 12 months ahead, up 1.1 percentage points compared to the previous quarter.

Expected annual wage growth

The economists expect annual wage growth of 3.9 per cent in 2022, same percentage as the previous quarter. Expected annual wage growth among the social partners is 3.9 per cent, down 0.1 percentage point from the previous quarter. Business leaders expect annual wage growth in their own company of 4.1 per cent this year, up 0.2 percentage point from the previous quarter. Households expect annual wage and pension income growth of 2.7 per cent the next 12 months, up 0.2 percentage point from the previous quarter.

Expected profitability

24.7 per cent of business leaders expect profitability of their own company to improve over the next 12 months, down 6.0 percentage points from the previous quarter. 37.5 per cent of business leaders expect profitability to remain unchanged over the next 12 months, down 2.0 percentage points from the previous quarter. 32.4 per cent expect profitability to weaken, up 6.1 percentage points from the previous quarter.

Brief summary of individual results for economists

Inflation

Economists expect goods and services inflation to be 3.7 per cent in 12 months, up 0.5 percentage point from the previous quarter. Expected annual inflation in 2 years is 3.0 per cent, up 0.3 percentage point from the previous quarter. Economists' expectation of annual inflation 5 years ahead is 2.5 per cent, up 0.2 percentage point from the previous quarter.

Expected annual wage growth

Economists expect annual wage growth to be 3.9 per cent in 2022, the same percentage as the previous quarter. Annual wage growth is expected to be 3.6 per cent for next year, up 0.2 percentage point from the previous quarter. The economists expect annual wage growth in 5 years to be 3.0 per cent, the same percentage as the previous quarter.

The krone exchange rate

31.9 per cent of the economists expect the effective krone exchange rate (measured by the trade-weighted krone exchange rate) to be stronger in 12 months, up 0.8 percentage point from the previous quarter. 38.3 per cent expect the effective krone exchange rate to be unchanged in 12 months, down 8.4 percentage points from the previous quarter. 23.4 per cent of the economists expect the effective krone exchange rate to be weaker in 12 months, up 3.4 percentage points from the previous quarter. Average expected appreciation of the krone exchange rate in 12 months is 0.7 per cent, down 1.0 percentage point from the previous quarter.

Brief summary of individual results for social partners

The survey

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth, the krone exchange rate and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions. This report and the main results of the expectations survey are published in full on the webpages of Ipsos (<https://www.ipsos.com/nb-no>). The survey of business leaders was broadened in 2009 to include enterprises with 20 or more employees (compared with 50 or more earlier). In addition, appx. 500 business leaders are now interviewed compared with appx. 300 earlier.

The survey for Q2 2022 was conducted in the period 19 April – 10 May 2022.

Questionnaire

To economists and social partners:

- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think average wage growth will be this year?
- What do you think average wage growth will be next year?
- What do you think average wage growth will be in five years?
- Do you think that in 12 months the krone exchange rate, as measured by the trade-weighted exchange rate index, will appreciate, remain unchanged or depreciate?
- By how much do you think it will appreciate/depreciate?

To business leaders:

- What do you think the general rise in prices for goods and services has been the last 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- Do you expect that over the next 12 months your business's purchase prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- Do you expect that over the next 12 months your business's selling prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- What do you think the average annual wage growth in your business will be this year?
- What do you think the average annual wage growth in your business will be next year?
- Over the past 12 months, has the profitability of your business, as measured by the operating margin (EBITDA), improved, remained unchanged or weakened?
- Do you think that over the next 12 months, the profitability of your business, as measured by the operating margin (EBITDA), will improve, remain unchanged or weaken?
- Compared with 12 months earlier, does your business currently have more employees, the same number of employees or fewer employees?
- Do you think that in 12 months, your business will have more employees than currently, the same number of employees or fewer employees?

To households:

- Compared with 12 months ago, do you think that prices for goods and services, as measured by the consumer price index (CPI), are now higher, approximately unchanged or lower?
- About how much higher/lower, measured in per cent?
- Do you think that over the next 12 months, prices for goods and services, as measured by the consumer price index (CPI), will be higher, unchanged or lower than they are currently?
- Will prices rise faster, at the same pace as currently, or more slowly?
- About how much higher/lower, measured in per cent?
- How much do you think prices for goods and services, as measured by the consumer price index (CPI), will rise annually in two to three years, in per cent?

- Ranked from 1 to 3, where 1 is highest, which three prices did you place the most emphasis on in the answers you just gave about expectations for price changes in the future?
- Compared with 12 months ago, by how much do you think your wages or pension has changed in per cent?
- By approximately how much do you think your wages or pension will change in per cent over the next 12 months?
- Do you think that over the next 12 months, the level of deposit and lending rates will rise, remain unchanged or fall?

Technical comments – Economists and social partners

SAMPLE AND SAMPLING METHOD	The sample consists of experts in the financial industry, academia and social partners, enrolled by Ipsos through email and from respondent lists from the previously conducted surveys. The lists are corrected for respondents who are no longer relevant, or no longer wish to participate.
NUMBER OF INTERVIEWS	In this survey, a total of 81 interviews are conducted among economists within academia and the financial industry, as well as representatives of the social partners. The survey includes 47 interviews with economists and 34 interviews with representatives of the social partners.
WEIGHT	The results in this survey are not weighted.
METHOD OF DATA COLLECTION	The fieldwork is done online. Respondents are invited to participate by email.
PERIOD OF DATA COLLECTION	The fieldwork was conducted in the period 19 April – 5 May 2022.
AVERAGE AND MEDIAN	Respondents who answered “I don’t know” are not included in the calculation of average and/or median.
EXTREME OBSERVATIONS	Extreme observations over 8 per cent (absolute value) are excluded from the presentation of the average figures for price and wage inflation.
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 6.2–14.1 percentage points for the main frequencies. The margin of error for sub-groups and possible contingency tables are greater.

Changes in the questionnaire (2015–2020)

¹: Until Q1 2020, questions 1-3 and 9-11 have had the following follow up question: “How likely do you think it is that the general rise in prices for goods and services in (12 months / 2 years / 5 years), as measured by the 12-month change in the consumer price index (CPI), will be within the following 6 intervals (your answers should sum to 100%): Higher than 4%, From 3% to 4%, From 2,5% to 3%, From 2% to 2,5%, From 1% to 2%, Lower than 1%.” The results from the follow up question have not been published in the report. The follow up question have been removed as of Q1 2020.

Question 27: By about how much do you think prices have changed measured in per cent?

(Comparison of differences in published average for question 26 in the period of 2015 - 2017)

The method for calculating the mean for historical figures in the period of 2015-2017 has been changed; the figures presented in the graph below as “Revised series” are comparable with the results published for the period before 2015.

Results published in the period of 2015-2017 as “Revised series” include those who answer “approximately unchanged” to question 25 as “0” in the mean calculations for question 26.

Results published in the period of 2015-2017 as “the previous published series” do not include those who answer “approximately unchanged” to question 26 as “0” in the mean calculation for question 27.

Technical comments - Households

Question 29: About how much higher/lower, measured in per cent?

(Comparison of differences in published average for question 28 in the period of 2015-2017)

The method for calculating the mean for historical figures in the period 2015-2017 has been changed; the figures presented in the graph below as “Revised series” are comparable with the results published for the period before 2015.

Results in the period of 2015-2017 as “Revised series” include those who answer “unchanged” to question 27 as “0” in the mean calculation for question 28.

Results published in the period of 2015-2017 as “the previous published series” do not include those who answer “unchanged” to question 28 as “0” in the mean calculation for question 29.
