NORGES BANK'S SURVEY OF BANK LENDING

Broadly unchanged credit demand

2019 Q3 PUBLISHED: 17 OCTOBER 2019

THE SURVEY WAS CONDUCTED IN THE PERIOD 23 SEPTEMBER 2019 – 08 OCTOBER 2019

Norges Bank's quarterly bank lending survey is a qualitative survey of banks' credit standards and their assessments of credit demand. The ten largest banks in the Norwegian credit market participate in the survey: DNB, Nordea, Danske Bank, Handelsbanken, Sparebank 1 SR-bank, Sparebank 1 Østlandet, Sparebank 1 SMN, Sparebank 1 Nord-Norge, Sparebanken Vest and Sparebanken Sør. The survey was conducted for the first time after 2007 Q4.

The questions distinguish between lending to households and lending to non-financial enterprises. Banks are asked to specify changes in credit demand, credit standards and conditions from the previous quarter to the quarter that has just come to an end. They are also asked to compare the quarter that has just come to an end with their expectations with regard to the next quarter. The questions are answered by ticking one of five responses: up a lot, up a little, same, down a little, down a lot. The responses are converted into a numerical scale ranging from +2 to -2 in the charts in this survey. If all the banks in the survey have answered that credit demand is up a little, the resulting figure for credit demand will be 1. If all the banks report that credit demand is up a lot, the resulting figure will be 2. The responses are aggregated and weighted to reflect the size of each bank's average loan volume for the past couple of years.

Some changes have been made to the questions in the survey and the way the results are reported, effective from 2016 Q3. Changes are minor and have not led to a break in the data series. Norges Bank's Staff Memo 17/2016 "Banks' reports of demand and credit standards since 2008: results from Norges Bank's Survey of Bank Lending" provides an account of the insights gained from the lending survey.

1

Norges Bank's Survey of Bank Lending 2019 Q3

Credit demand from both households and enterprises was broadly unchanged in 2019 Q3. Credit standards and lending conditions were unchanged. Banks reported somewhat higher lending rates in both segments, reflecting somewhat higher funding costs. Margins fell somewhat on loans to households and were approximately unchanged for non-financial enterprises. For both segments in Q4, banks expect marginal change in overall credit demand. Slight increases in both lending rates and funding costs are also expected in Q4.

Lending to households

Overall household demand for residential mortgage loans was approximately unchanged in Q3 (Charts 1 and 3). Banks expect little change to residential mortgage demand ahead.

Banks reported no substantial changes in credit standards for households in Q3 (Charts 2 and 4). No changes are expected ahead.

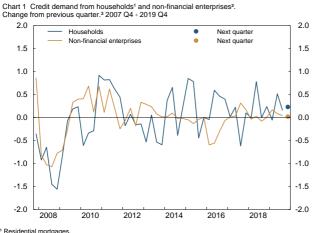

Banks reported somewhat higher interest rates owing to the policy rate increase. Banks also reported gradually declining residential mortgage lending margins in Q3. Margins fell owing to somewhat higher funding costs and somewhat stronger competition (Charts 9 and 10). Slight increases in both lending rates and funding costs are expected ahead.

Lending to non-financial enterprises

Overall credit demand from non-financial enterprises was unchanged in Q3 (Chart 1). Demand for fixed-rate loans increased marginally (Chart 11). No changes are expected ahead.

Banks reported unchanged credit standards for enterprises in Q3 (Charts 2 and 12). There were insignificant changes in the individual factors affecting credit standards and loan conditions were virtually unchanged (Charts 13-16).

Banks reported somewhat higher lending rates for loans to enterprises in Q3 and a corresponding increase in funding costs (Charts 17 and 18). Lending margins were unchanged. No changes are expected ahead.
