EXPECTATIONS SURVEY FOR NORGES BANK Q2 2024

The survey questions economists, social partners, business leaders
and households

16 May 2024

Preface

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth, the krone exchange rate and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions.

The survey questions four target groups. Online surveys are used for economists in the financial industry and academia, as well as for representatives of main employer and employee organisations and business leaders. Telephone interviews are used for a random selection of individuals in Norwegian households.

The expectations survey is conducted every quarter and was conducted for the first time in February 2002. Ipsos has conducted the survey from Q3 2020. The report is written by Lars Erik Lie. The survey was previously carried out by Epinion, Opinion and TNS Gallup.

Summary

Brief, overall summary

Note: Changes in mean values are addressed in this summary. In some cases, the change in median value and mean value may differ. This applies in particular to target groups with a low sample, such as the social partners and economists. All median and mean values are stated in the detailed report.

Short-term price inflation

The economists expect goods and services inflation 12 months ahead to be 3.6 per cent, down 0.1 percentage point from the previous quarter. The social partners expect goods and services inflation to be 4.1 per cent 12 months ahead, down 0.4 percentage point from the previous quarter. Business leaders expect goods and services inflation to be 4.6 per cent 12 months ahead, down 0.3 percentage point from the previous quarter. Households expect goods and services inflation to be 2.8 per cent 12 months ahead, up 0.1 percentage point compared to the previous quarter.

Expected average rise in real wages

The economists expect the average rise in real wages will be 1.2 per cent in 2024, up 0.3 percentage point from the previous quarter. The social partners expect the average rise in real wages to be 1.3 per cent this year, up 0.6 percentage point from the previous quarter.

Expected annual wage growth

The economists expect annual wage growth of 5.1 per cent in 2024, up 0.1 percentage point from the previous quarter. Expected annual wage growth among the social partners is 5.0 per cent, down 0.1 percentage point from the previous quarter. Business leaders expect annual wage growth in their own company of 5.1 per cent this year, up 0.4 percentage point from the previous quarter. Households expect annual wage and pension income growth of 3.7 per cent the next 12 months, up 0.4 percentage point from the previous quarter.

Expected profitability

24.0 per cent of business leaders expect profitability of their own company to improve over the next 12 months, down 1.6 percentage points from the previous quarter. 38.9 per cent of business leaders expect profitability to remain unchanged over the next 12 months, a decrease of 0.1 percentage point from the previous quarter. 33.7 per cent expect profitability to weaken, up 2.6 percentage points from the previous quarter.

Brief summary of individual results for economists

Inflation

Economists expect goods and services inflation to be 3.6 per cent in 12 months, down 0.1 percentage point from the previous quarter. Expected annual inflation in 2 years is 3.0 per cent, down 0.1 percentage point from the previous quarter. Economists' expectation of annual inflation 5 years ahead is 2.4 per cent, down 0.2 percentage point from the previous quarter.

Average rise in real wages

The economists expect the average rise in real wages to be 1.2 per cent in 2024, up 0.3 percentage point from the previous quarter. Next year the economists expect the average rise in real wages to be 0.9 per cent, unchanged from the previous quarter. In five years, they expect the average rise in real wages to be 0.8 per cent, unchanged from the previous quarter.

Expected annual wage growth

The survey

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth, the krone exchange rate and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions. This report and the main results of the expectations survey are published in full on the webpages of Ipsos (<https://www.ipsos.com/nb-no>). The survey of business leaders was broadened in 2009 to include enterprises with 20 or more employees (compared with 50 or more earlier). In addition, appx. 500 business leaders are now interviewed compared with appx. 300 earlier.

The survey for Q2 2024 was conducted in the period 11 April to 2 May 2024.

Questionnaire

To economists and social partners:

- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think average rise in real wages will be this year?
- What do you think average rise in real wages will be next year?
- What do you think average rise in real wages will be in 5 years?
- What do you think average wage growth will be this year?
- What do you think average wage growth will be next year?
- What do you think average wage growth will be in five years?

To business leaders:

- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- Do you expect that over the next 12 months your business's purchase prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- Do you expect that over the next 12 months your business's selling prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- What do you think the average annual wage growth in your business will be this year?
- What do you think the average annual wage growth in your business will be next year?
- Over the past 12 months, has the profitability of your business, as measured by the operating margin (EBITDA), improved, remained unchanged or weakened?
- Do you think that over the next 12 months, the profitability of your business, as measured by the operating margin (EBITDA), will improve, remain unchanged or weaken?
- Compared with 12 months earlier, does your business currently have more employees, the same number of employees or fewer employees?
- Do you think that in 12 months, your business will have more employees than currently, the same number of employees or fewer employees?
- Do you know what the inflation target of the Norwegian Central Bank is?

To households:

- Do you think that over the next 12 months, prices for goods and services, as measured by the consumer price index (CPI), will be higher, unchanged or lower than they are currently?
- About how much higher/lower, measured in per cent?
- How much do you think prices for goods and services, as measured by the consumer price index (CPI), will rise annually in two to three years, in per cent?
- How much do you think prices for goods and services, as measured by the consumer price index (CPI), will rise annually in 5 years, in percent?

- Compared with 12 months ago, by how much do you think your wages or pension has changed in per cent?
- By approximately how much do you think your wages or pension will change in per cent over the next 12 months?
- Do you think that over the next 12 months, the level of deposit and lending rates will rise, remain unchanged or fall?
- Do you know what the inflation target of the Norwegian Central Bank is?

Technical comments – Economists and social partners

SAMPLE AND SAMPLING METHOD	The sample consists of experts in the financial industry, academia and social partners, enrolled by Ipsos through email and from respondent lists from the previously conducted surveys. The lists are corrected for respondents who are no longer relevant, or no longer wish to participate.
NUMBER OF INTERVIEWS	In this survey, a total of 81 interviews are conducted among economists within academia and the financial industry, as well as representatives of the social partners. The survey includes 45 interviews with economists and 36 interviews with representatives of the social partners.
WEIGHT	The results in this survey are not weighted.
METHOD OF DATA COLLECTION	The fieldwork is done online. Respondents are invited to participate by email.
PERIOD OF DATA COLLECTION	The fieldwork was conducted in the period 12 April – 2 May 2024.
AVERAGE AND MEDIAN	Respondents who answered “I don’t know” are not included in the calculation of average and/or median.
EXTREME OBSERVATIONS	<p>From Q1 2023 extreme observations above and below 10 percentage points of the median are excluded from the presentation of the average figures for price and wage inflation. The rest of the report is not adjusted for extreme values.</p> <p>Until Q4 2022 extreme observations above 8 per cent (absolute value) were excluded from the presentation of the average figures for price and wage inflation.</p>
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 6.9–15.9 percentage points for the main frequencies. The margin of error for sub-groups and possible contingency tables are greater.

Changes in the questionnaire (2015–2023)

¹ Until Q1 2020, questions 1-3 and 9-11 have had the following follow up question: “How likely do you think it is that the general rise in prices for goods and services in (12 months / 2 years / 5 years), as measured by the 12-month change in the consumer price index (CPI) , will be within the following 6 intervals (your answers should sum to 100%): Higher than 4%, From 3% to 4%, From 2,5% to 3%, From 2% to 2,5%, From 1% to 2%, Lower than 1%.” The results from the follow up question have not been published in the report. The follow up question have been removed as of Q1 2020.

² New questions were added in Q4 2022, and are presented as extra questions no.1, 2,3,4,5 and 6. These are later removed.

³ New questions were added in Q1 2023, and are presented as new questions no. 4, 5, 6, 13, 14 and 15

Technical comments – Business leaders

SAMPLE AND SAMPLING METHOD	The sample consists of a representative sample of CEOs, CFOs and purchasing managers in Norwegian businesses with 20 employees or more. The sample comes from a pre-recruited panel. All interviews are done online.
NUMBER OF INTERVIEWS	A total of 512 (weighted) interviews have been conducted among business leaders, of which 256 (weighted) are for businesses with 50 employees or more, and 256 (weighted) are for businesses with less than 50 employees.
WEIGHT	The results in this survey are weighted based on the following variables: geography (region), sector (industry), and number of employees in the business. Weighted base is presented in the report.
METHOD OF DATA COLLECTION	The fieldwork is done online. Respondents are invited to participate by email/SMS.
PERIOD OF DATA COLLECTION	The fieldwork was conducted in the period 11 April – 2 May 2024.
AVERAGE AND MEDIAN	Respondents who answered “I don’t know” are not included in the calculation of average and/or median.
EXTREME OBSERVATIONS	<p>From Q1 2023 extreme observations above and below 10 percentage points of the median are excluded from the presentation of the average figures for price and wage inflation. The rest of the report is not adjusted for extreme values.</p> <p>Until Q4 2022 extreme observations above 11 per cent (absolute value) were excluded from the presentation of the average figures for price and wage inflation.</p>
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 1.9–4.3 percentage points for the main frequencies. The margin of error for subgroups and possible contingency tables are greater.

Changes in the questionnaire (2015–2023)

² Question 15 was introduced Q3 2020. All question numbers are adjusted between the quarters.

³ Question 17 changed from «What do you think the general rise in prices will be in two years?» to «What do you think the general rise in prices for goods and services will be in two years, as measured by the consumer price index?» (1. Q. 2015)

⁴ Question 22 changed from «Over the past 12 months, has the profitability of your business improved, remained unchanged or weakened?» to «Over the past 12 months, has the profitability of your business, as measured by the operating margin (EBITDA), improved, remained unchanged or weakened?» (1. Q. 2015)

⁵ Question 23 changed from «Do you think that over the next 12 months, the profitability of your business will improve, remain unchanged or weaken?» to «Do you think that over the next 12 months, the profitability of your business, as measured by the operating margin (EBITDA), will improve, remain unchanged or weaken?» (1. Q. 2015)

⁶ Question 24 changed from «Compared with 1 year earlier, does your business currently have more employees, the same number of employees or fewer employees?» to «Compared with 12 months earlier, does your business currently have more employees, the same number of employees or fewer employees?» (1. Q. 2015)

⁷ Until Q1 2020, question 16 and 17 have had the following follow up question: “How likely do you think it is that the general rise in prices for goods and services in (12 months / 2 years), as measured by the 12-month change in the consumer price index (CPI), will be within the following 6 intervals (your answers should sum to 100%): Higher than 4%, From 3% to 4%, From 2,5% to 3%, From 2% to 2,5%, From 1% to 2%, Lower than 1%”. The

results from the follow up question have not been published in the report. The follow up question has been removed as of Q1 2020.

⁸: Questions 36 and 37 were introduced in Q4 2020. With regard to data processing, these have been given numbers 36 and 37 and therefore do not follow the remaining question numbering.

⁹: New questions added in Q1 2022, and are presented as questions 36, 37, 38 and 39. These are later removed.

¹⁰: New questions were added in Q4 2022, and are presented as extra questions no.7, 8 and 9. These are later removed.

¹¹: New questions were added in Q1 2023, and are presented as new questions no.30

EXTREME OBSERVATIONS	<p>From Q1 2023 extreme observations above and below 10 percentage points of the median are here excluded from the presentation of the average figures for price and wage inflation. The rest of the report is not adjusted for extreme values.</p> <p>Until Q4 2022 extreme observations above 11 per cent (absolute value) were excluded from the presentation of the average figures for price and wage inflation.</p>
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 1.3–3.1 percentage points for the main frequencies. The margin of error for sub-groups and possible contingency tables are greater.

Changes in the questionnaire (2015–2023)

¹⁰: Question 26 changed from «Compared with 12 months ago, do you think that prices for goods and services are now much higher, somewhat higher, slightly higher, approximately unchanged and lower» to «Compared with 12 months ago, do you think that prices for goods and services, as measured by the consumer price index, are now higher, approximately unchanged or lower?» (1. Q. 2015)

¹¹: Question 27 changed from «By about how much do you think prices have changed measured in per cent?» to «About how much higher/lower, measured in per cent?». Question 27 is put to those who answered to question 26 that they think prices for goods and services, as measured by the consumer price index, are now higher, approximately unchanged or lower. (1. Q. 2015)

¹²: Question 28 changed from «Do you think that over the next 12 months, prices for goods and services will be higher, unchanged or lower than they are currently?» to «Do you think that over the next 12 months, prices for goods and services, as measured by the consumer price index, will be higher, unchanged or lower than they are currently?» (1. Q. 2015)

¹³ Question 29 changed from «By about how much do you think prices will change in the next 12 months, measured in per cent?» to «About how much higher/lower, measured in per cent?». Question 29 is put to those who answered to question 28 that, over the next 12 months, they expect the prices for goods and services, as measured by the consumer price index, to be higher, unchanged or lower than they are currently. (1. Q. 2015)

¹⁴ Question 30 changed from «If higher: Will prices rise faster, at the same pace as currently, or more slowly?» to «Will prices rise faster, at the same pace as currently, or more slowly (If answered higher to question 28)?» (1. Q. 2015)

¹⁵ Question 32 changed from «How much do you think prices for goods and services will rise annually in two to three years, in per cent?» to «How much do you think prices for goods and services, as measured by the consumer price index, will rise annually in two to three years, in per cent?» (1. Q. 2015)

¹⁶ Until Q1 2020, question 26, 28 and 32 have had the following follow up question: “You answered that the prices (have increased by X% / have fallen approximately X% / are approximately unchanged) ... (text from question 26, 28 and 32). On a scale from 1 to 4, where 1 is very unsure and 4 is very sure, how sure do you feel that you will be right?” The results from the follow up question have not been published in the report. The follow up question has been removed as of Q1 2020.

¹⁷ New questions added in Q2 2021, and presented as question 38, 39 and 40. These are later removed.

Question 32: By about how much do you think prices have changed measured in per cent?

(Comparison of differences in published average for question 32 in the period of 2015 - 2017)

The method for calculating the mean for historical figures in the period of 2015-2017 has been changed; the figures presented in the graph below as “Revised series” are comparable with the results published for the period before 2015.

Results published in the period of 2015-2017 as “Revised series” include those who answer “approximately unchanged” to question 25 as “0” in the mean calculations for question 26.

Results published in the period of 2015-2017 as “the previous published series” do not include those who answer “approximately unchanged” to question 26 as “0” in the mean calculation for question 27.
