

Bank reserves from 15.09.2023 to 15.11.2023. Mill NOK

The figures show Norges Bank's forecast for structural liquidity and actual development of sight deposits based on information up until 25.09.2023. The forecast show the banks sight deposits and overnight loans in Norges Bank before supply and withdrawal of reserves through Norges Bank's open market operations (F-loans, currency swaps, F-deposits). The annual forecast is based on a number of technical assumptions, including the issuance of government securities. The forecast has considerable uncertainty.
