- ⌘NB⌘ Norges Bank
- ### Pengepolitisk strategi – Inflasjonsrapport 1/06
- Hovedstyrets vurdering er at foliorenten bør ligge i intervallet $2\frac{1}{4}$ - $3\frac{1}{4}$ prosent i perioden fram til neste inflasjonsrapport legges fram 29. juni, betinget av at den økonomiske utviklingen blir om lag som anslått
 - Renten kan gradvis – i små og ikke hyppige skritt – bringes tilbake mot et mer normalt nivå. Hensynet til å bringe inflasjonen tilbake til målet og forankre inflasjonsforventningene tilsier likevel en fortsatt ekspansiv pengepolitikk.
